

## Being Open 24/7 is NOT an Option for Most Businesses. We're Open All Day, Every Day.

---

Being open 24/7 is not an option for most businesses. In our business, it's mandatory. We answer the phone. We make appointments. We get you when you're needed, and we don't bother you when it isn't an emergency.

At **Personal Touch Communications**, we believe that taking care of your customers is just as important as taking care of you. That's right. Without them, we couldn't have you as a client — so they must be important. We treat them that way, 24/7. So we train our staff to take care of your clients as you would take care of them - like your livelihood depended on it.

And while we actually do take care of your clients as well as we do you, we respect that your time is your own. When emergency situations present themselves, you may need to be contacted. We can separate the day-to-day calls from the emergency calls. And we deal with all of your clients and potential clients with respect and professionalism.

Call **Personal Touch Communications** today! We'll set up a program tailored to your company's individual needs. We can demo our system for you, and show you how we put your clients first.
